Features & Advantages:

- Balkar Rotavator can be operated either in wet or dry condition of soil for preparing seed bed.
- Balkar Rotavator completely uproots stubbles of crop residue like sugarcane, cotton and Paddy etc. and chopping them into small pieces and mixing them back into the soil which helps to build up the humus content of the soil.
- Balkar Rotavator provides perfect tilth. The depth of the tilling can be adjusted as per requirement.
- Balkar Rotavator levels the field perfectly even.
- Balkar Rotavator do all the above mentioned functions in single operation which saves times, reduces costs, increase yield and ultimately reap more profit
